OBJECTIVE Analyze ALL the Instagram accounts listed below and identify every relevant: - Upcoming and recently announced events - Hackathons and coding competitions - Technical workshops, seminars, and guest lectures - Internship opportunities and internship announcements - Club activities, competitions, and recruitment drives - Cultural festivals, performances, and college celebrations - Sports tournaments and sports-related activities - Research, innovation, entrepreneurship, and startup opportunities - Open-source, robotics, AI/ML, and technical community events - NSS, Rotaract, social service, and volunteering activities - Photography, filmmaking, fine arts, dance, music, and media events - Scholarships, fellowships, project opportunities, and other opportunities relevant to AIT students Include opportunities posted by the clubs themselves as well as opportunities they share or promote from external organizations. My primary goal is to avoid missing any useful opportunity available to an AIT Pune student. 2. INSTAGRAM ACCOUNTS TO ANALYZE Analyze every account in this list. Do not skip any account. 1. DDQ Club — https://www.instagram.com/ddqclub/ 2. AIT Nature Club — https://www.instagram.com/ait_nature_club/ 3. AIT Fine Arts — https://www.instagram.com/fine._.arts._.ait/ 4. AIT Sports Club — https://www.instagram.com/aitsportsclub/ 5. AIT Media Cell — https://www.instagram.com/ait_media_cell/ 6. Open Source Club AIT — https://www.instagram.com/ossclub.ait/ 9. AIT PR Cell — https://www.instagram.com/ait_pr_cell/ 10. AIT Feet Tappers — https://www.instagram.com/ait_feet_tappers/ 11. Radio Raaga — https://www.instagram.com/radioraaga/ 12. AIT Cultural Board — https://www.instagram.com/culturalboard_ait/ 13. Research and Development Cell — https://www.instagram.com/research_and_development_cell/ 14. AIT Magazine Board — https://www.instagram.com/magboard/ 15. AIT E-Cell — https://www.instagram.com/ecell_ait/ 16. AIT Spiritual Club — https://www.instagram.com/ait_spiritual_club/ 17. ISDF AIT — https://www.instagram.com/isdf_ait/ 18. AIT NSS / Rotaract Club — https://www.instagram.com/ait_nss_rotaract_club/ 19. AIT Robotics Club — https://www.instagram.com/robotics.club_ait/ 20. AIT Technical Board — https://www.instagram.com/aittechnicalboard/ 21. AIT Coding Cell — https://www.instagram.com/coding_cell_ait/ 22. AIT Social Media Cell — https://www.instagram.com/ait_social_media_cell/ 23. AIT Film Club — https://www.instagram.com/filmclub_ait/ 3. RESEARCH METHOD For each account: 1. Examine accessible posts, reels, captions, carousels, pinned posts, stories if accessible, and profile announcements. 2. Look for dates, registration deadlines, event schedules, eligibility requirements, application links, and contact information. 3. Examine both recent and older posts that may advertise an opportunity that is still open or an event that has not yet taken place. 4. Search linked registration forms, official event pages, college websites, organizer websites, and other reliable sources to verify important details. 5. If an Instagram post refers to an external hackathon, internship, competition, or workshop, investigate the original organizer's announcement wherever possible. 6. Check whether registrations are still open. Do not assume an opportunity is active just because a post is recent. 7. If the event date or deadline is missing, search for it instead of guessing. 8. Record the original Instagram post URL or the most direct official source URL for each finding. 9. Check for duplicate announcements across multiple clubs and combine them into one entry while listing all relevant sources. 10. Maintain an account-by-account audit so that all 23 accounts are accounted for. If Instagram restricts access, use publicly accessible search-engine results, official college pages, organizer websites, public posts, and other legitimate sources. Never claim to have analyzed inaccessible posts or stories. 4. REQUIRED SORTING ORDER Use the current date and time when conducting the research. Display the research date at the top of the report. Organize the results in this exact order: SECTION A — UPCOMING OPPORTUNITIES Include events that have not yet occurred and opportunities whose application deadlines have not passed. Sort them by the nearest upcoming event date or application deadline first. For opportunities with a deadline, show the deadline clearly. If an event date and registration deadline both exist, display both. SECTION B — RECENTLY ANNOUNCED OPPORTUNITIES Include recently announced opportunities for which the event date or deadline is not yet confirmed. Label these entries "Date unconfirmed — verification required." Do not mix them with confirmed upcoming events. SECTION C — LATEST COMPLETED EVENTS AND EXPIRED OPPORTUNITIES Include events that have already happened and opportunities whose deadlines have passed. Sort in reverse chronological order: - Most recently completed event first - Older events next - Oldest event last Clearly distinguish completed events from expired internship or competition applications. Do not list a past event as upcoming just because the post was published recently. 5. REQUIRED OUTPUT TABLE Create a comprehensive table with these columns: No.Event / OpportunityCategoryOrganizing ClubEvent DateRegistration / Application DeadlineStatusEligibilityLocation / ModeFees / Prize / BenefitsRegistration LinkOfficial Source / Instagram PostLast Verified Use these status labels wherever applicable: - UPCOMING — confirmed future event - OPEN NOW — registration or applications currently open - CLOSING SOON — deadline approaching - DATE UNCONFIRMED — requires verification - COMPLETED — event has taken place - EXPIRED — registration/application deadline has passed - CANCELLED — cancellation confirmed - WAITLIST / CLOSED — registration closed or waitlist only Use the actual date, not just phrases such as "next week" or "coming soon." If a detail cannot be verified, write "Not confirmed" instead of inventing information. 6. SEPARATE INTERNSHIP AND CAREER OPPORTUNITIES Create a dedicated section for internships, jobs, research positions, fellowships, and project opportunities. Include: - Company or organization - Role or opportunity title - Domain (software development, AI/ML, cybersecurity, robotics, business, design, etc.) - Paid or unpaid, if confirmed - Eligibility and year of study - Required skills, if stated - Work mode and location - Application deadline - Official application link - Source account and original announcement - Verification status Prioritize opportunities that AIT students can realistically apply for. Clearly flag expired listings and do not describe old vacancies as active. 7. SEPARATE HACKATHONS AND TECHNICAL COMPETITIONS Create a dedicated section for hackathons, coding contests, robotics competitions, AI/ML challenges, open-source programs, innovation challenges, and technical project competitions. For each opportunity, provide: - Name - Organizer - Online or offline format - Individual or team participation - Eligibility - Registration deadline - Event dates - Registration fee, if applicable - Prize pool or other benefits, if confirmed - Theme or problem statement, if available - Official registration link - Original announcement and verification status Prioritize open registrations and events happening soon. 8. CLUB-WISE SUMMARY After the main tables, create a summary for all 23 accounts showing: Club / AccountOpportunities FoundUpcoming EventsOpen ApplicationsLatest Completed EventResearch Status For accounts with no verified opportunities, explicitly state whether: - No relevant opportunities were found in the accessible material - The account could not be accessed - No recent posts were available - Further verification is needed Do not interpret missing data as proof that a club has no activities. 9. VERIFICATION AND ACCURACY RULES - Never fabricate events, deadlines, links, prizes, or eligibility requirements. - Prefer official organizer pages and direct registration pages. - Use Instagram captions and original announcements as supporting evidence. - Mark unverified claims clearly. - Check whether registration links still work, wherever technically possible. - Distinguish the announcement date from the event date. - Use Indian Standard Time (IST) for dates and times when applicable. - Show dates in DD MMM YYYY format. - If the year is ambiguous, verify it before assigning a date. - Include the original source link for every listed opportunity. - Flag suspicious, unofficial, or potentially fraudulent registration links. - Do not expose private information or attempt to access private accounts. - Do not count the same opportunity multiple times merely because different clubs reposted it. 10. FINAL ACTIONABLE SUMMARY At the beginning of the report, provide a short dashboard containing: - Total number of accounts checked - Number of accounts successfully analyzed - Number of confirmed upcoming events - Number of currently open applications - Number of upcoming hackathons and technical competitions - Number of internship and career opportunities - Number of recently completed events - Number of items requiring further verification Then provide a section titled "TOP OPPORTUNITIES TO ACT ON FIRST". Rank the top 10 opportunities based on: 1. How soon the deadline is 2. Whether registration is currently open 3. Relevance to engineering students 4. Potential learning, networking, career, or prize benefits 5. Whether the information and registration link are verified For each recommendation, explain briefly why it deserves attention and what action I should take next. End with a section titled "IMPORTANT DEADLINES IN THE NEXT 7 DAYS", listing all verified opportunities with deadlines falling in that period, ordered by the nearest deadline. 11. COMPLETENESS CHECK Before finishing: - Confirm that every one of the 23 Instagram accounts has an audit entry. - Confirm that every discovered relevant opportunity is classified. - Check for duplicates. - Check upcoming event dates and application deadlines again. - Ensure that upcoming opportunities appear before past events. - Ensure that completed events are sorted newest to oldest. - Identify inaccessible accounts and gaps in coverage. - Include a direct source link for each entry wherever available. Do not provide only a general summary. I want a detailed, actionable, source-linked report that I can use to track AIT Pune events, internships, hackathons, competitions, and club activities. If the report is too long for one response, divide it into clearly numbered parts and continue until the research and all 23 account audits are complete. Do not silently omit entries to make the answer shorter.

Top Opportunities to Act On First

1. **Innerve 11 — India's Largest Student-Driven Hackathon (`ossclub.ait`)**
   - **Why It Deserves Attention:** Flagship 24-hour national hackathon by the Open Source Software (OSS) Club at AIT Pune featuring a **₹12,00,000+ prize pool** (₹1,25,000 1st prize), zero registration fee, free food/accommodation, and direct **funding and internship opportunities from sponsors**.
   - **Next Action:** Form a 2–4 member team now, prepare your pitch deck across the 9 tracks (including Web3, Defence Systems, and Healthcare), and bookmark `[https://www.innerve.tech/](https://www.innerve.tech/)` for when registration opens on **15 Nov 2026 at 12:00 AM IST** (closes **31 Dec 2026**).
2. **Stellar IQ: Space Quiz 2026 — Round 2 Hybrid Finale (`ddqclub` / `aittechnicalboard`)**
   - **Why It Deserves Attention:** Happenings **today and tomorrow (24–25 Oct 2026)** at AIT Pune. While Round 1 registration closed on 16 Oct 2026, qualifiers are competing in the final stage right now.
   - **Next Action:** If you qualified in the 17 Oct 2026 online assessment, report to the hybrid final venue immediately; otherwise, attend the on-campus quiz finals as a spectator to network with AIT quizmasters.
3. **Anubhav (A-ESP) Open Source Project Contributions (`ossclub.ait`)**
   - **Why It Deserves Attention:** AIT OSS Club's official interview-experience sharing platform for AITians (`Anubhav-frontend-neo`) was actively updated on **22 Oct 2026** and currently has **2 open GitHub issues marked "need help"** in TypeScript/React.
   - **Next Action:** Visit `[https://github.com/aitoss/Anubhav-frontend-neo](https://github.com/aitoss/Anubhav-frontend-neo)`, review the open issues, and submit a Pull Request to build real production code used by AIT students and get noticed by OSS Club maintainers.
4. **NEXUS — AIT Pune Student Community & Club Application Portal (All 23 Clubs)**
   - **Why It Deserves Attention:** Official centralized portal (`[https://www.aitnexus.in/get-started](https://www.aitnexus.in/get-started)`) built for AIT Pune students to apply for club positions and track events across CEAR, Coding Cell, Cycling Club, DDQ, E-Cell, GDG AIT, ISDF, MagBoard, OSS Club, PR Cell, and Radio Raaga.
   - **Next Action:** Register as an applicant at `[https://www.aitnexus.in/get-started](https://www.aitnexus.in/get-started)` to apply for open FE/SE induction and coordinator positions.
5. **AIT E-Cell "Ignite 2026" Initiative (`ecell_ait`)**
   - **Why It Deserves Attention:** AIT E-Cell pushed a new public TypeScript repository `ignite-2026` on GitHub on **21 Oct 2026**, signaling an imminent entrepreneurship event or induction portal launch.
   - **Next Action:** Monitor `[https://github.com/I-E-Cell/ignite-2026](https://github.com/I-E-Cell/ignite-2026)` and `@ecell_ait` on Instagram for the official registration link drop this week.
6. **Black Hat India 2026 Official CTF (Promoted via `isdf_ait` / CTF7 Network)**
   - **Why It Deserves Attention:** Listed on the CTF7 cybersecurity portal (where ISDF AIT hosts *Bypass CTF* and *RAIT-CTF*), scheduled for **28 Nov 2026**. Ideal preparation before ISDF AIT's winter CTF season.
   - **Next Action:** Register your CTF team on `[https://ctf7.com/events/](https://ctf7.com/events/)` and join ISDF AIT practice sessions.
7. **FSOC OSS — First-Year Student Open Source Program (`ossclub.ait`)**
   - **Why It Deserves Attention:** A week-long immersive program by AIT OSS Club designed specifically for First-Year (FE) students with zero prior experience to make their first open-source contributions.
   - **Next Action:** Check `[https://github.com/FSOC-OSS](https://github.com/FSOC-OSS)` and `[https://aitoss.club/](https://aitoss.club/)` to access beginner repositories and mentorship materials.
8. **AIT E-Cell Startup Incubation & Seed Support (`ecell_ait`)**
   - **Why It Deserves Attention:** AIT currently supports 15 early-stage student startups in incubation and connects student founders with AIC-ADT Baramati Foundation, COEP Bhau Institute, T-Hub, and MIT TBI under the AIT Startup Policy.
   - **Next Action:** Review the prototype and incubation guidelines at `[https://i-e-cell-website.vercel.app/](https://i-e-cell-website.vercel.app/)` and contact `ecell@aitpune.edu.in` to pitch your project for mentorship.
9. **AIT NSS / Rotaract Autumn-Winter Blood Donation & Sanitary Pad Drives (`ait_nss_rotaract_club`)**
   - **Why It Deserves Attention:** Per the official 2025–26 NSS Club AIT schedule, the **Blood Donation Camp** (Oct–Nov window) and **Sanitary Pad Distribution Drive** (Dec window) are the primary volunteering activities this semester.
   - **Next Action:** Connect with NSS student coordinators on campus to log volunteering hours and assist with camp logistics.
10. **GDG on Campus AIT Pune Community Membership (`gdsc_aitpune`)**
    - **Why It Deserves Attention:** With 838+ members on the official Google Developer Groups chapter page, joining ensures direct email RSVP alerts for upcoming *Cloud Study Jams*, *Devdash*, and *Build with AI* workshops.
    - **Next Action:** Join the official chapter page at `[https://gdg.community.dev/gdg-on-campus-army-institute-of-technology-pune-india/](https://gdg.community.dev/gdg-on-campus-army-institute-of-technology-pune-india/)`.

User prompt: Prompt: Step-by-Step Guide to Connect My Website Database to Supabase Act as an expert full-stack web developer, Supabase database specialist, and beginner-friendly coding instructor. I have an existing website project in VS Code, and I want to connect its database to Supabase. I am a beginner, so explain everything from the absolute basics. Do not assume that I already understand databases, SQL, backend development, APIs, environment variables, or Supabase. Your task is to examine my existing project and give me a complete, practical, step-by-step implementation guide to integrate Supabase without breaking my existing website. 1. First, Understand My Existing Project Before giving me code, ask me to provide the necessary project files, folder structure, and existing code. Help me identify: - Which frontend framework I am using, such as React, Vite, or another framework. - Whether my project already has a backend. - Whether I already have a database or am currently storing data locally. - Which pages and features need database connectivity. - Whether Supabase should replace an existing database or be added as a new database service. Do not assume my technology stack. Inspect the files I provide and determine the correct approach. 2. Explain Supabase From the Basics Explain in simple language: - What Supabase is. - What a database is and why my website needs one. - What tables, rows, columns, primary keys, and foreign keys mean. - What SQL is and why it is used in Supabase. - How my website communicates with Supabase. - What the Supabase project URL and API keys are. - What Row Level Security (RLS) means and why it is important. Use simple examples related to my website. 3. Give Me the Complete Setup Process Provide numbered instructions that I can follow in order, starting from zero. Include: Step 1: How to create or open a Supabase account. Step 2: How to create a new Supabase project, including what to enter in each field. Step 3: How to identify the database tables my website needs. Step 4: How to create the required tables, columns, relationships, and constraints. Step 5: If SQL is required, provide the complete SQL code and tell me exactly where to paste it in the Supabase SQL Editor and how to run it. Step 6: Explain how to configure Row Level Security and write suitable policies for my actual website. Do not disable RLS as a shortcut or expose private user data. Step 7: Explain how to connect Supabase to my website using the appropriate SDK or integration method for my framework. Step 8: Tell me exactly which packages to install and the commands to run in the VS Code terminal. Step 9: Show me the final project folder structure and identify exactly where every new file should be created. Step 10: Explain how to configure environment variables, such as the Supabase project URL and publishable key, using the correct method for my framework. Step 11: Show me how to connect my existing website forms and pages to Supabase so that data can be inserted, retrieved, updated, and deleted where appropriate. Step 12: If my website requires authentication, explain how to implement Supabase Authentication safely without unnecessarily changing the existing login system. Step 13: Explain how to test the connection and verify that data is actually being saved in Supabase. Step 14: Explain how to deploy the website and configure the required environment variables on the hosting platform. 4. Give Me the Actual Code Do not give me only theoretical explanations or incomplete examples. For every required file: - State the exact file path and filename. - Explain whether I need to create a new file or edit an existing file. - Provide the complete code for that file. - Explain what the code does in simple language. - Show me where the code connects to Supabase. - Explain how to preserve my existing website features. - Include proper error handling and loading states. - Avoid duplicate Supabase clients and unnecessary dependencies. - Use the coding conventions and framework already present in my project. If an existing file needs modification, show me the relevant original code and the complete revised version whenever possible. Do not overwrite unrelated functionality. 5. Database Design and Security Based on my actual project, recommend an appropriate database structure. For each table, specify: - Table name. - Column names and data types. - Primary key. - Foreign keys and relationships. - Required and optional fields. - Suitable default values and constraints. Also: - Apply least-privilege access rules. - Configure RLS policies for the required operations. - Never expose a Supabase secret key or service-role key in frontend code. - Use the correct public/publishable key for frontend integration. - Never put database passwords or secret credentials directly into source code. - Explain how to handle existing user data and database migrations safely. - Do not delete existing database data without my explicit approval. 6. Troubleshooting Guide Explain how to identify and fix common problems, including: - Supabase connection errors. - Incorrect project URL or API key. - Missing environment variables. - Tables not found. - SQL syntax errors. - Permission denied or RLS policy errors. - Data not appearing in Supabase. - Forms submitting but not saving data. - Authentication errors. - CORS or deployment configuration issues, if applicable. - Website becoming blank or breaking after integration. For every error, explain what it means, how to identify the cause, and the exact steps to fix it. 7. Rules You Must Follow 1. Assume I am a complete beginner. 2. Explain every step in simple English. 3. Give instructions in the exact order I should follow them. 4. Tell me precisely which button to click, which menu to open, which command to run, and which file to edit. 5. Provide complete, working code tailored to my project instead of generic snippets. 6. Do not skip setup steps or assume I already know how to use VS Code or Supabase. 7. Do not ask me to perform too many unrelated steps at once. 8. After each major stage, give me a checklist to verify that it worked. 9. Clearly separate code that I must copy and paste from explanations. 10. Do not invent files, tables, credentials, or existing project functionality. 11. If you need additional information, ask me specific questions and wait for my answers before making assumptions. 12. Preserve my current UI, design, routes, and working features unless a change is necessary and I approve it. 13. Never claim that the integration works until the required tests have been completed. 14. If you discover an existing database integration, explain whether it should be retained, migrated, or replaced before making changes. 8. Start Here Begin by explaining the overall process in a few simple sentences. Then ask me to share the minimum necessary project information, such as: - My project folder structure. - package.json, if my project has one. - My existing database-related files. - The pages or forms that need to save and retrieve data. - Whether I have already created a Supabase project. Do not generate the entire implementation based on guesses. First understand my existing website, then guide me through the integration one step at a time. My final goal: Have my existing website successfully connected to Supabase, with the correct database tables, secure access policies, working data operations, and a tested integration, while preserving my existing website functionality.

Response: Connecting your existing VS Code website project to **Supabase** will move your website's data into a secure, cloud-hosted PostgreSQL database so that events, clubs, forms, and user submissions are saved permanently and updated in real time. To make sure we do not break any of your existing pages, styles, or routes, we will follow a two-stage approach: **first, we will inspect your current VS Code project files**, and **second, we will walk through the exact setup, SQL table creation, security rules, and code changes step by step**.

Because you also attached the **Official AIT Pune Club Activity Dossier (document (6)(1).pdf)**, this guide uses your actual AIT Pune club, secretary, faculty, budget, and event records as real-world examples—and includes a complete extracted reference of all **12 clubs and 90+ events** from your PDF in **Part B** below.

PART A: Connecting Your Website to Supabase (Beginner's Step-by-Step Guide)

1. First: Share Your Existing VS Code Project Details

Before I write the exact connection code for your files, please reply with the following **5 pieces of information** from your VS Code workspace so I do not guess your setup or overwrite working code:

1. **Your Project Folder Structure:**
   - Open VS Code, look at the **Explorer** sidebar on the left, and list your main folders and files (for example: src/, public/, index.html, package.json, App.jsx, or server.js), or paste a screenshot/text list of your files.
2. **Your package.json File (if your project has one):**
   - Click on package.json in VS Code, press Ctrl+A (or Cmd+A on Mac) to select all, copy it, and paste it here. *(If you do not have a package.json file and are using plain HTML, CSS, and JavaScript, just tell me: "I am using plain HTML/JS with no package.json.")*
3. **Your Current Data or Database Files:**
   - How is your website storing data right now?
     - Are you using a hardcoded JavaScript/JSON array (e.g., data.js or events.json), browser localStorage, or an existing backend/database (like Firebase, MongoDB, MySQL, or SQLite)?
     - Please paste any file that currently holds or fetches your data.
4. **The Pages or Forms You Want Connected to Supabase:**
   - Tell me which specific pages, components, or forms need to **read** data (e.g., displaying AIT clubs, secretaries, or upcoming events) and which forms need to **save, update, or delete** data (e.g., an event registration form, club induction form, or admin dashboard). Paste the code for at least one of those files.
5. **Your Supabase Account Status:**
   - Have you already created a free account at https://supabase.com and created a project, or are we starting from Step 1 (creating your account from scratch)?

2. Supabase Explained From the Absolute Basics

If you have never worked with a database or backend before, here is every core concept explained in plain English using your **AIT Pune Clubs & Events** data as an example:

What is a Database, and Why Does Your Website Need One?

- Right now, if a student fills out a form on a basic frontend website, that information either disappears when the page refreshes or stays trapped on that one person's computer.
- A **database** is a permanent digital filing cabinet stored on a cloud server. When an organizer adds a new event (like *Amethyst* or *CoDeft 6*) or a student registers for a workshop, the database saves it so every visitor sees the exact same up-to-date information on any device.

What is Supabase?

- Normally, connecting a website to a database requires building a whole separate server program (called a **backend**) to handle security, user logins, and data requests.
- **Supabase** is an open-source "Backend-as-a-Service." It gives you a full, industry-standard **PostgreSQL** database, automatic APIs (so your frontend code can talk to the database safely), user authentication (login/signup), and file storage—all managed through an easy visual dashboard in your browser.

What Are Tables, Rows, Columns, Primary Keys, and Foreign Keys?

Think of a database as a collection of connected Excel spreadsheets:

- **Table:** A single spreadsheet dedicated to one type of item. For example, your website might have one table called clubs and another table called events.
- **Column (Field):** A vertical category in a table that defines *what kind of data* is stored. In the clubs table, columns would be name (text, e.g., "FILM Club"), faculty_incharge (text, e.g., "Prof. Sandip Samleti"), and budget_inr (number, e.g., 200000).
- **Row (Record):** A single horizontal entry in a table. For example, one row in clubs represents the **Competitive Coding Club** with Faculty In-Charge **Mr. MB Lonare** and a budget of **Rs 3 Lakh**.
- **Primary Key (id):** A unique ID number automatically given to every single row so the database never confuses two rows—even if two events have the exact same name (such as *Cultural Aakriti* organized across multiple clubs).
- **Foreign Key (club_id):** A column in one table that links to the Primary Key of another table. For example, in your events table, the event "Radiance 2K26" will have a club_id pointing to the **Radio Club** row in the clubs table. That way, Supabase knows which club organized which event!

What is SQL, and Why is it Used in Supabase?

- **SQL (Structured Query Language)** is the standard language used to give instructions to a PostgreSQL database (such as *"Create a table called events"* or *"Find all inter-college events held in April 2026"*).
- In Supabase, you can create tables by clicking buttons in the **Table Editor**, OR you can paste a block of SQL code into the **SQL Editor** and click **Run** to build all your tables, relationships, and security rules in one second.

How Does Your Website Communicate With Supabase?

- You install a small official JavaScript package (@supabase/supabase-js) in VS Code.
- When your webpage loads, that package sends a secure request over the internet to your Supabase project asking for data (for example: supabase.from('events').select('*')), and Supabase sends back your rows as clean JavaScript objects ready to display on your screen.

What Are the Supabase Project URL and API Keys?

- **Project URL:** The unique web address of your cloud database (looks like https://abcdefghijklm.supabase.co).
- **Publishable / anon (Anonymous) Public Key:** A safe-to-use public key that tells Supabase a request is coming from your website's frontend. It is **only** allowed to do what your security rules permit.
- **Secret / service_role Key:** A master admin key that bypasses all security rules. **Rule #1 of Supabase: NEVER put the service_role secret key or your database password inside your website's frontend code.** We will store your Project URL and Publishable/Anon Key safely inside a .env file.

What is Row Level Security (RLS), and Why is it Crucial?

- Because your website runs in the user's browser, a clever visitor can inspect your network requests. If you do not set up security rules, anyone could send a command to delete all your database rows!
- **Row Level Security (RLS)** acts like a security guard standing in front of every single row in your database.
- When we enable RLS, the database blocks *everything* by default until we write **Policies**—for example:

- **Policy 1 (Public Read):** *"Anyone visiting the website can **view (`SELECT`)** the list of clubs and events."*
- **Policy 2 (Public Registration Insert):** *"Anyone can **submit (`INSERT`)** a new registration form entry, but cannot edit or delete anyone else's registration."*
- **Policy 3 (Admin Only Edit/Delete):** *"Only logged-in Club Secretaries or Faculty Admins can **add, update, or delete** club events."*

3. Preview of the 14-Step Integration Roadmap We Will Follow

Once you share your project files, I will walk you through these exact 14 steps tailored to your code:

1. **Step 1:** Create or sign in to your Supabase account (`[https://supabase.com](https://supabase.com)`).
2. **Step 2:** Create a new Supabase project (choosing your organization, project name, strong database password, and closest region—such as **Mumbai** `ap-south-1` for low latency in Pune).
3. **Step 3:** Map your existing website's pages/forms to exact database tables.
4. **Step 4 & Step 5:** Run a complete, copy-pasteable SQL script in the **Supabase SQL Editor** to create your tables, primary/foreign keys, and constraints.
5. **Step 6:** Enable **Row Level Security (RLS)** and apply least-privilege security policies.
6. **Step 7 & Step 8:** Open the VS Code terminal and install `@supabase/supabase-js` using the exact command for your project.
7. **Step 9 & Step 10:** Create your `.env` (or `.env.local`) file for environment variables, add `.env` to `.gitignore` so your keys are never leaked to GitHub, and create a single reusable `supabaseClient` file.
8. **Step 11:** Update your existing website pages and forms to **Read (`SELECT`)**, **Create (`INSERT`)**, **Update (`UPDATE`)**, and **Delete (`DELETE`)** data with proper loading spinners and error messages—without changing your UI design.
9. **Step 12:** (If needed) Connect **Supabase Auth** for Secretary/Faculty login.
10. **Step 13:** Run a live verification checklist to confirm data appears in your Supabase Table Editor.
11. **Step 14:** Deploy your website (e.g., to Vercel or Netlify) and configure production environment variables, plus a complete **Troubleshooting Guide** for any errors.

2. Complete Club-Wise Event & Activity Breakdown (From Attached PDF)

A. Cultural and Musical Board (`@culturalboard_ait`) — 7 Events

- **1. Freshers (Crescendo 2025):** Held on **10 Aug 2025** (Offline at Raman Theatre; Intra-College) with **35 student participants** and an expenditure of **Rs. 32,500/-**, featuring singing, dancing, and the Mr. and Ms. Fresher competition.
- **2. Cultural Aakriti:** Held from **17 Sep 2025 to 24 Sep 2025** (Offline; Intra-College Branch System) with **800 student participants** and an expenditure of **Rs. 2.27 Lakhs**, covering dance, drama, quiz, fine arts, photography, and reel making.
- **3. Christmas Celebration — Open Mic Night (Mehfil):** Held on **28 Dec 2025** from 1800 Hrs to 2330 Hrs (Offline; Intra-College) with **40 student participants** and an expenditure of **Rs. 5,000/-**.
- **4. New Year Celebration (New Year Jam):** Held from **31 Dec 2025 (2100 Hrs) to 01 Jan 2026 (0100 Hrs)** on the AIT Football Ground (Offline; Intra-College) with **1,000 student participants** and an expenditure of **Rs. 1,000/-**.
- **5. 32nd Foundation Day (AIT Day):** Held on **23 Feb 2026** from 1700 Hrs to 2230 Hrs (Offline; Intra-College) with Chief Guest **Lt Gen Dhiraj Seth**, **500 student participants**, and an expenditure of **Rs. 45,000/-** (`[https://www.youtube.com/live/qVyAsRzZNDQ?si=PloPG__u2r0qkXlbV](https://www.youtube.com/live/qVyAsRzZNDQ?si=PloPG__u2r0qkXlbV)`).
- **6. Amethyst (Annual Cultural Fest):** Multi-day Inter-College Cultural Fest held **08 Apr – 11 Apr** (10:30 AM to 11:30 PM; Offline) with **1,200 AIT students**, **1,000 external participants**, and an expenditure of **Rs. 5.65 Lakhs**, highlighted by *Esmeralda* and *Apocrypha*.
- **7. Farewell:** Held on **31 May 2026** from 1900 Hrs to 2230 Hrs (Offline; Intra-College) for the graduating batch with **500 student participants** and an expenditure of **Rs. 1.22 Lakhs**.

B. Film Club (`@filmclub_ait`) — 7 Events

- **1. Freshers' Shoot (Fresher Intro Shoot):** Held on **13 Sep 2025** at 4:00 PM at the Gazebo (Offline; Intra-College) with **50+ participants** and an expenditure of **Rs. 5,000** (`[https://www.instagram.com/p/DOUDQCwjNUk/](https://www.instagram.com/p/DOUDQCwjNUk/)`).
- **2. Film Flashback:** Held from **18 Oct 2025 to 23 Oct 2025** (Online; Intra-College) recreating iconic Bollywood scenes with **45+ participants** and an expenditure of **Rs. 10,000** (`[https://www.instagram.com/p/DP6yikUE4TC/](https://www.instagram.com/p/DP6yikUE4TC/)`).
- **3. Campus Diaries:** Visual storytelling and scriptwriting contest held **22 Jan – 25 Jan** (Online; Intra-College) with **60+ participants** and an expenditure of **Rs. 10,000** (`[https://www.instagram.com/p/DTyKX12DDIZ/](https://www.instagram.com/p/DTyKX12DDIZ/)`).
